

## CLAIMS

What is claimed is:

1. A speaker system, comprising:

a sound box having an interior divided into a plurality of air chambers,  
each air chamber being formed with an air passing hole connecting at least a  
neighboring air chamber and at least an air dissipating hole connecting the  
atmosphere; and

a speaker retained in a mounting opening formed in the sound box,  
which connects one of the air chambers.

2. The speaker system as set forth in claim 1, wherein the speaker is retained in the  
mounting opening which connects the first air chamber of the sound box.

3. The speaker system as set forth in claim 1, wherein the interior of the sound box  
is provided with a plurality of dividers for the formation of the air chambers, and  
the air passing hole of each of the air chambers for connecting the neighboring  
air chamber is formed on each of the dividers.

4. The speaker system as set forth in claim 1, wherein the dividers are parallelly  
arranged in the sound box.
